Education

● **Le Wagon**

Full-Stack Developer Course
2020

- 9-week intensive coding bootcamp

● **University of Coimbra**

Master's in Finance
2016 – 2019

- Best Student Award

● **University of Coimbra**

Bachelor's Degree in Management
2013 – 2016

- 3% Best Students Award

● **University of Economics of Prague**

Erasmus Mobility Program
2015 - 2016

Soft Skills

- Problem-solving skills

- Analytical capacity

- Fast learning capabilities

- Teamwork

Languages

Portuguese   Native

English   Advanced (C1)

Edgar Marques

Full-Stack Developer

My journey began in the field of finance, but shortly after joining the job market I discovered my passion for the tech sector, which led me to turn my life around and learn how to code. At the moment, my skill set is focused on Ruby on Rails and JavaScript, having already built several web apps.

Skills

Languages

- Ruby
- JavaScript ES6
- HTML 5
- CSS 3

Frameworks / Libraries (and the like)

- Ruby on Rails
- React
- Node.js
- jQuery

Other tools: SQL Databases, API, AJAX, Git/GitHub, Sass, OPP, MVC, REST, Unit Testing, Bootstrap, Webpack, Heroku, Stripe...

Personal Projects

Hook (check the website and the repository)

A web platform for fisherman to record their fishing trips and to get predictions on the best fishing locations available

Main features: Implemented a machine learning algorithm to predict the best fishing locations available; integrated location and weather APIs; built a REST API

Technologies: Ruby on Rails, JavaScript, HTML, CSS, PostgreSQL, API (integration and building), AJAX, Machine Learning

Artisan (check the repository)

An online marketplace for craftwork

Main features: Integrated the Stripe's payment processing API; simulated orders delivery using Background Jobs; created a custom autocomplete search bar

Technologies: Ruby on Rails, JavaScript, HTML, CSS, PostgreSQL, AJAX, Stripe

Trip Finder (check the repository)

A web platform that fetches data from airline and housing websites in order to find the best travel packages available (work in progress)

Technologies: Ruby on Rails, React, HTML, CSS, API (integration), Web Scraping

Work Experience

Accountant at My Business (03/2018 - 08/2019)

- Coordinated a small team responsible for the accounting process of 50 clients
- Used a new technology to automate the accounting process, which resulted in a reduction of the time spent on certain tasks up to a quarter of the original
