Education

Le Wagon

Full-Stack Developer Course
2020

- 9-week intensive coding bootcamp

University of Coimbra

Master's in Finance
2016 – 2019

- Best Student Award

University of Coimbra

Bachelor's Degree in Management
2013 – 2016

- 3% Best Students Award

University of Economics of Prague

Erasmus Mobility Program
2015 - 2016

Soft Skills

- Problem-solving skills

- Analytical capacity

- Fast learning capabilities

- Teamwork

Languages

Portuguese   Native

English   Advanced (C1)

Edgar Marques

Full Stack Developer

I first learned to code in college. I was pursuing a career in finance, but my focus on math-related subjects quickly led me into the world of programming. Then, when I entered the workforce, I discovered the true power of coding in solving practical problems. That was when I decided to turn my life around and pursue a career in tech. At the moment, I am full stack developer with a skill set focused on Ruby on Rails and JavaScript.

Technical Skills

Languages: Ruby, JavaScript ES6, HTML 5, CSS 3, SQL, Python, R

Frameworks / Libraries: Ruby on Rails, React, Node.js, jQuery

Other tools: Git/GitHub, Unit Testing, API, OOP, MVC, Sass, Bootstrap, Webpack, Heroku, Stripe

Personal Projects

Hook (check the website and the repository)

A web platform for fisherman to record their fishing trips and to get predictions on the best fishing locations available

Main features: Implemented a machine learning algorithm to predict the best fishing locations available; integrated location and weather APIs; built a REST API

Technologies: Ruby on Rails, JavaScript, HTML, CSS, PostgreSQL, API (integration and building), Machine Learning

Artisan (check the repository)

An online marketplace for craftwork

Main features: Integrated the Stripe's payment processing API; simulated orders delivery using Background Jobs; created a custom autocomplete search bar

Technologies: Ruby on Rails, JavaScript, HTML, CSS, PostgreSQL, Stripe

Trip Finder (check the repository)

A web platform that fetches data from airline and housing websites in order to find the best travel packages available (work in progress)

Technologies: Ruby on Rails, React, HTML, CSS, API (integration), Web Scraping

Work Experience

Accountant at My Business - Accounting Firm (03/2018 - 08/2019)

- Coordinated a small team responsible for the accounting process of 50 clients
- Used a new technology to automate the accounting process, which resulted in a reduction of the time spent on certain tasks by up to a quarter of the original
